

PowerSchool Parent Log-in

Fort Scott USD 234

PowerSchool is a program that will allow a parent/guardian access to all of his/her students with just one username and password. This will allow you to access more information in a shorter amount of time, but this change requires the parent/guardian to set up the account before it can be used. The steps listed below should help you navigate through the “log on/create account” phase.

- Go to www.usd234.org

- Along the right side of the screen, click the  button
- Click on [Parents/Guardians](#)
- Select the “**Create Account**” button located in the lower right portion of the screen. (Do not log in using Access ID and password.)
- Enter your first name, last name, e-mail address, and create your own username and password. (The password must include at least 6 characters.)
- List household students. For each student, you will have to enter:
 - Student’s first name
 - School-issued access ID*
 - School-issued password*
*(you can contact the office to obtain this information)
 - Choose the relationship of student (daughter, son, etc.)
(Complete this step for each student in the household.)
 - Select the “**Enter**” button located in the lower right portion of the screen. This will take you back to the login screen.
- Log in using the new username and password you have created.
 - A tab at the top will allow you to change the student.
 - “Account Preferences” tab will allow you to edit email accounts, usernames, passwords, and add more students.
